

Allergen and Anaphylaxis Policy.

This policy is for Barleyhurst Park School and Barleyhurst Park Nursery.

Agreed by Governors: 02.06.2026

To be reviewed: Summer 2027

Statement of Intent

Barleyhurst Park Primary School strives to ensure the safety and wellbeing of all members of the school community. For this reason, this policy is to be adhered to by all staff members, parents and pupils, with the intention of minimizing the risk of anaphylaxis occurring whilst at school.

In order to effectively implement this policy and ensure the necessary control measures are in place, parents are responsible for working alongside the school in identifying allergens and potential risks, in order to ensure the health and safety of their children.

The school does not guarantee a completely allergen-free environment; however, this policy will be utilised to minimize the risk of exposure to allergens, encourage self-responsibility, and plan for an effective response to possible emergencies.

1. Legal Framework

This policy has due regard to all relevant legislation and guidance including, but not limited to, the following:

- Children and Families Act 2014;
- The Human Medicines (Amendment) Regulations 2017;
- The Food Information (Amendment) (England) Regulations 2019 (Natasha's Law);
- Department of Health 'Guidance on the use of adrenaline auto-injectors in schools';
- DfE 'Supporting pupils at school with medical conditions';
- DfE 'Allergy guidance for schools'.

This policy will be implemented in conjunction with the following school policies and documents:

- Health and Safety Policy;
- Whole-school Food Policy;
- Administering Medication Policy;

- Supporting Pupils with Medical Conditions Policy;
- Educational Visits and School Trips Policy.

2. Definitions

For the purpose of this policy:

Allergy - is a condition in which the body has an exaggerated response to a substance. This is also known as hypersensitivity.

Allergen - is a normally harmless substance that triggers an allergic reaction for a susceptible person.

Allergic reaction - is the body's reaction to an allergen and can be identified by, but not limited to, the following symptoms:

- Hives;
- Generalised flushing of the skin;
- Itching and tingling of the skin;
- Tingling in and around the mouth;
- Burning sensation in the mouth;
- Swelling of the throat, mouth or face;
- Feeling wheezy;
- Abdominal pain;
- Rising anxiety;
- Nausea and vomiting;
- Alterations in heart rate;
- Feeling of weakness.

Anaphylaxis - is also referred to as anaphylactic shock, which is a sudden, severe and potentially life-threatening allergic reaction. This kind of reaction may include the following symptoms:

- Persistent cough;
- Throat tightness;
- Change in voice, e.g. hoarse or croaky sounds;
- Wheeze (whistling noise due to a narrowed airway);
- Difficulty swallowing/speaking;
- Swollen tongue;
- Difficult or noisy breathing;
- Chest tightness;
- Feeling dizzy or faint;
- Suddenly becoming sleepy, unconscious or collapsing;
- For infants and younger pupils, becoming pale or floppy.

3. Roles and Responsibilities

The Governing Board is responsible for:

- Ensuring that policies, plans, and procedures are in place to support pupils with allergies and those who are at risk of anaphylaxis and that these arrangements are sufficient to meet statutory responsibilities and minimise risks.
- Ensuring that the school's approach to allergies and anaphylaxis focusses on, and accounts for, the needs of each individual pupil.

- Ensuring that staff are properly trained to provide the support that pupils need, and that they receive allergy and anaphylaxis training at least annually.
- Monitoring the effectiveness of this policy and reviewing it every two years, and after any incident where a pupil experiences an allergic reaction.

The Headteacher is responsible for:

- The development, implementation and monitoring of this policy and related policies.
- Ensuring that parents are informed of their responsibilities in relation to their child's allergies.
- Ensuring that all relevant risk assessments, e.g. to do with food preparation, have been carried out and controls to mitigate risks are implemented.
- Ensuring that all designated first aiders are trained in the use of adrenaline auto-injectors (AAIs) and the management of anaphylaxis.
- Ensuring that all staff members are provided with information regarding allergic reactions and anaphylaxis, including the necessary precautions and how to respond.
- Ensuring that catering staff are aware of pupils' allergies and act in accordance with the school's policies regarding food and hygiene, including this policy.

All staff members are responsible for:

- Attending relevant training regarding allergens and anaphylaxis.
- Being familiar with and implementing pupils' individual healthcare plans (IHPs) as appropriate.
- Responding immediately and appropriately in the event of a medical emergency.
- Reinforcing effective hygiene practices, including those in relation to the management of food.
- Monitoring all food supplied to pupils by both the school and parents.
- Ensuring that pupils do not share food and drink in order to prevent accidental contact with an allergen.

The Main Lunchtime Server is responsible for:

- Monitoring the food allergen log and allergen tracking information for completeness.
- Reporting any non-conforming food labelling to the supplier, where necessary.
- Ensuring the practices of kitchen staff comply with food allergen labelling laws and that training is regularly reviewed and updated.
- Recording incidents of non-conformity, either in allergen labelling, use of ingredients or safe staff practice, in an allergen incident log.
- Acting on entries to the allergen incident log and ensuring the risks of recurrence are minimised.

Kitchen staff are responsible for:

- Ensuring they are fully aware of the rules surrounding allergens, the processes for food preparation in line with this policy, and the processes for identifying pupils with specific dietary requirements.
- Ensuring they are fully aware of whether each item of food served contains any of the main 14 allergens, as is a legal obligation, and making sure this information is readily available for those who may need it.

- Ensuring that the required food labelling is complete, correct, clearly legible, and is either printed on the food packaging or attached via a secure label.

All parents are responsible for:

- Notifying the school of their child's allergens, the nature of the allergic reaction, what medication to administer, specified control measures and what can be done to prevent the occurrence of an allergic reaction.
- Keeping the school up-to-date with their child's medical information.
- Providing written consent for the use of a spare AAI.
- Providing the school with written medical documentation, including instructions for administering medication as directed by the child's doctor.
- Raising any concerns they may have about the management of their child's allergies with the classroom teacher.

All pupils are responsible for:

- Ensuring that they do not exchange food with other pupils.
- Avoiding food which they know they are allergic to, as well as any food with unknown ingredients.
- Notifying a member of staff immediately in the event they believe they are having an allergic reaction, even if the cause is unknown, or have come into contact with an allergen.

4. Food Allergies

Parents will provide the school with a written list of any foods that their child may have an adverse reaction to, as well as the necessary action to be taken in the event of an allergic reaction, such as any medication required.

Information regarding all pupils' food allergies will be collated, indicating whether they consume a school dinner or a packed lunch, and this will be passed on to the school's catering service.

When making changes to menus or substituting food products, the school will ensure that pupils' special dietary needs continue to be met by:

- Checking any product changes with all food suppliers;
- Asking caterers to read labels and product information before use;
- Using the Food Standards Agency's allergen matrix to list the ingredients in all meals;
- Ensuring allergen ingredients remain identifiable.

The caterer has a full list of allergens and avoids using them within the menu where possible. When they are used the caterer will ensure that they provide an appropriate alternative for any pupil who has known allergies and the substitute item is clearly labelled.

Where meals include allergens or traces of allergens, staff will use clear and fully visible labels, in line with this policy, to denote the allergens of which consumers should be aware.

The school will ensure that there are always dairy- and gluten-free options available for pupils with allergies and intolerances.

To ensure that catering staff can appropriately identify pupils with dietary needs, pupils will allergens will have their information clearly displayed in the serving area and on the class list. They will be given a blue plate for their meals.

All food tables will be disinfected before and after being used.

The chosen catering service of the school is responsible for ensuring that the school's policies are adhered to at all times, including those in relation to the preparation of food, taking into account any allergens.

Learning activities which involve the use of food, such as food technology lessons, will be planned in accordance with pupils' IHPs, taking into account any known allergies of the pupils involved. If staff are not sure whether a child can have an item they will check with the parent, showing them any packaging for the item.

5. Food Allergen Labelling

The school will adhere to allergen labelling rules for pre-packed food goods, in line with the Food Information (Amendment) (England) Regulations 2019, also known as Natasha's Law. The school will ensure that all food is labelled accurately, that food is never labelled as being 'free from' an ingredient unless staff are certain that there are no traces of that ingredient in the product, and that all labelling is checked before being offered for consumption.

The relevant staff, e.g. kitchen staff, will be trained prior to storing, handling, preparing, cooking and/or serving food to ensure they are aware of their legal obligations. Training will be reviewed on an annual basis, or as soon as there are any revisions to related guidance or legislation.

Food Labelling

Food goods classed as 'pre-packed for direct sale' (PPDS) will clearly display the following information on the packaging:

- The name of the food;
- The full ingredients list, with ingredients that are allergens emphasised, e.g. in bold, italics, or a different colour.

The school will ensure that allergen traceability information is readily available. Allergens sheets will be completed for foods being offered to children in school.

- Allergen information will be obtained from the supplier and recorded, upon delivery, in a food allergen log stored in the kitchen;
- The food allergen log will be monitored for completeness on a regular basis by the Business Support Assistant;
- Incidents of incorrect practices and incorrect and/or incomplete packaging will be recorded in an incident log and managed by the SLT.

Declared Allergens

The following allergens will be declared and listed on all PPDS foods in a clearly legible format:

- Cereals containing gluten and wheat, e.g. spelt, rye and barley;
- Crustaceans, e.g. crabs, prawns, lobsters;
- Nuts, including almonds, hazelnuts, walnuts, cashews, pecan nuts, brazil nuts and pistachio nuts;
- Celery;
- Eggs;
- Fish;
- Peanuts;
- Soybeans;
- Milk;
- Mustard;

- Sesame seeds;
- Sulphur dioxide and sulphites at concentrations of more than 10mg/kg or 10mg/L in terms of total sulphur dioxide;
- Lupin;
- Molluscs, e.g. mussels, oysters, squid, snails.

Following any changes to ingredients and/or food packaging, all associated documentation will be reviewed and updated as soon as possible.

6. Animal Allergies

Pupils with known allergies to specific animals will have restricted access to those that may trigger a response. In the event of an animal on the school site, staff members will be made aware of any pupils to whom this may pose a risk and will be responsible for ensuring that the pupil does not come into contact with the specified allergen.

The school will ensure that any pupil or staff member who comes into contact with the animal washes their hands thoroughly to minimise the risk of the allergen spreading.

A supply of antihistamine medicine will be kept in the in case of an allergic reaction.

7. Seasonal Allergies

The term 'seasonal allergies' refers to common outdoor allergies, including hay fever and insect bites. Precautions regarding the prevention of seasonal allergies include ensuring that grass within the school premises is not mown whilst pupils are outside.

Pupils with severe seasonal allergies will be provided with an indoor supervised space to spend their break and lunchtimes in, avoiding contact with outside allergens.

Staff members will monitor pollen counts, making a professional judgement as to whether the pupil should stay indoors. Pupils will be encouraged to wash their hands after playing outside.

Staff members will be diligent in the management of wasp, bee and ant nests on school grounds and in the school's nearby proximity, reporting any concerns to the Headteacher.

The Headteacher is responsible for ensuring the appropriate removal of wasp, bee and ant nests on and around the school premises.

Where a pupil with a known allergy is stung or bitten by an insect, medical attention will be given immediately.

8. Adrenaline Auto-injectors (AAIs)

Pupils who suffer from severe allergic reactions may be prescribed an AAI for use in the event of an emergency.

Under The Human Medicines (Amendment) Regulations 2017 the school is able to purchase AAI devices without a prescription, for emergency use on pupils who are at risk of anaphylaxis, but whose device is not available or is not working.

Appropriate paperwork is completed for each pupil who has an AAI and this is reviewed annually with the parent. This information is displayed on the cupboard door in the classroom, in the medical room, in the staffroom and in the servery. This will clearly outline the symptoms for the individual child, where their medication is stored and when to administer it.

All staff have access to AAI devices, but these are out of reach and inaccessible to pupils - AAI devices are not locked away where access is restricted.

In line with manufacturer's guidelines, all AAI devices are stored at room temperature in line with manufacturer's guidelines, protected from direct sunlight and extreme temperature.

The Teaching Assistants for each class are responsible for maintaining the emergency anaphylaxis kit(s) for the pupils in their class.

Any used or expired AAIs are returned to the parent so they can be disposed of in accordance with manufacturer's instructions. Used AAIs may also be given to paramedics upon arrival, in the event of a severe allergic reaction, in accordance with this policy.

Where any AAIs are used, the following information will be recorded on the AAI Record:

- Where and when the reaction took place;
- How much medication was given and by whom.

9. School Trips

The Headteacher will ensure a risk assessment is conducted for each school trip to address pupils with known allergies attending. All activities on the school trip will be risk assessed to see if they pose a threat to any pupils with allergies and alternative activities will be planned where necessary to ensure the pupils are included.

The school will speak to the parents of pupils with allergies where appropriate to ensure their co-operation with any special arrangements required for the trip.

A designated adult will be available to support the pupil at all times during a school trip. If the pupil has been prescribed an AAI, at least one adult trained in administering the device will attend the trip. The pupil's medication will be taken on the trip and stored securely. A member of staff will be assigned responsibility for ensuring that the pupil's medication is carried at all times throughout the trip. Two AAIs will be taken on the trip and will be easily accessible at all times.

10. Medical Attention and Required Support

Once a pupil's allergies have been identified, a meeting will be set up between the pupil's parents and a relevant member of staff in which the pupil's allergies will be discussed and a plan of appropriate action/support will be developed.

All medical attention, including that in relation to administering medication, will be conducted in accordance with the Administering Medication Policy and the Supporting Pupils with Medical Conditions Policy.

Parents will provide the school with any necessary medication, ensuring that this is clearly labelled with the pupil's name, class, expiration date and instructions for administering it.

All members of staff involved with a pupil with a known allergy are aware of the location of emergency medication and the necessary action to take in the event of an allergic reaction. Any specified support which the pupil may require will be outlined in their IHP.

All staff members providing support to a pupil with a known medical condition, including those in relation to allergens, will be familiar with the pupil's IHP.

The SENDCo and an HLTA are responsible for working alongside relevant staff members and parents in order to develop IHPs for pupils with allergies, ensuring that any necessary support is provided and the required documentation is completed, including risk assessments being undertaken.

The SENDCo has overall responsibility for ensuring that IHPs are implemented, monitored and communicated to the relevant members of the school community.

11. Staff Training

Designated staff members will be trained in how to administer an AAI, and the sequence of events to follow when doing so.

In accordance with the Supporting Pupils with Medical Conditions Policy, staff members will receive appropriate training and support relevant to their level of responsibility, in order to assist pupils with managing their allergies.

Teaching Assistants who are first aid trained will be taught to:

- Recognise the range of signs and symptoms of severe allergic reactions.
- Respond appropriately to a request for help from another member of staff.
- Recognise when emergency action is necessary.
- Administer AAIs according to the manufacturer's instructions.
- Make appropriate records of allergic reactions.

All staff members will:

- Be trained to recognise the range of signs and symptoms of an allergic reaction.
- Understand how quickly anaphylaxis can progress to a life-threatening reaction, and that anaphylaxis can occur with prior mild to moderate symptoms.
- Understand that AAIs should be administered without delay as soon as anaphylaxis occurs.
- Understand how to check if a pupil is on the Register of AAIs.
- Understand how to access AAIs.
- Understand who the first aiders are, and how to access their help.
- Understand that it may be necessary for staff members other than those who are first aid trained to administer AAIs, e.g. in the event of a delay in response from the first aider, or a life-threatening situation.
- Be aware of how to administer an AAI should it be necessary.
- Be aware of the provisions of this policy.

12. Mild to Moderate Allergic Reaction

Mild to moderate symptoms of an allergic reaction include the following:

- Swollen lips, face or eyes;
- Itchy/tingling mouth;
- Hives or itchy skin rash;
- Abdominal pain or vomiting;
- Sudden change in behaviour;

If any of the above symptoms occur in a pupil, the nearest adult will stay with the pupil and refer to their IHP to determine appropriate next steps.

The pupil's parents will be contacted immediately if a pupil suffers a mild to moderate allergic reaction, and if any medication has been administered.

In the event that a pupil without a prescribed AAI, or who has not been medically diagnosed as being at risk of anaphylaxis, suffers an allergic reaction, a designated staff member will contact the emergency services and seek advice as to whether an AAI should be administered. An AAI will not be administered in these situations without contacting the emergency services.

For mild to moderate allergy symptoms, the pupil's IHP will be followed and the pupil will be monitored closely to ensure the reaction does not progress into anaphylaxis.

Should the reaction progress into anaphylaxis, the school will act in accordance with this policy. Where the pupil is required to go to the hospital, an ambulance will be called.

13. Managing Anaphylaxis

In the event of anaphylaxis, the nearest adult will lay the pupil flat on the floor and try to ensure the pupil suffering an allergic reaction remains as still as possible; if the pupil is feeling weak, dizzy, appears pale and is sweating their legs will be raised. A designated staff member will be called for help and the emergency services contacted immediately. The designated staff member will administer an AAI to the pupil. Where there is any delay in contacting designated staff members, the nearest staff member will administer the AAI. If necessary, other staff members may assist the designated staff members with administering AAIs.

A member of staff will stay with the pupil until the emergency services arrive - the pupil will remain lying flat and still. If the pupil's condition deteriorates after initially contacting the emergency services, a second call will be made to ensure an ambulance has been dispatched.

The Headteacher will be contacted immediately, as well as a suitably trained individual, such as a first aider.

If the pupil stops breathing, a suitably trained member of staff will administer CPR.

If there is no improvement after five minutes, a further dose of adrenaline will be administered using another AAI.

In the event that a pupil without a prescribed AAI, or who has not been medically diagnosed as being at risk of anaphylaxis, suffers an allergic reaction, a designated staff member will contact the emergency services and seek advice.

A designated staff member will contact the pupil's parents as soon as is possible.

Upon arrival of the emergency services, the following information will be provided:

- Any known allergens the pupil has;
- The possible causes of the reaction, e.g. certain food;
- The time the AAI was administered - including the time of the second dose, if this was administered.

Any used AAIs will be given to paramedics.

Staff members will ensure that the pupil is given plenty of space, moving other pupils to a different room where necessary.

Staff members will remain calm, ensuring that the pupil feels comfortable and is appropriately supported.

Two members of staff will accompany the pupil to hospital in the absence of their parents.

Following the occurrence of an allergic reaction, the SLT will review the adequacy of the school's response and will consider the need for any additional support, training or other corrective action.

14. Monitoring and Review

The Headteacher is responsible for reviewing this policy every two years or sooner if necessary. Following each occurrence of an allergic reaction, this policy and pupils' IHPs will be updated and amended as necessary. The effectiveness of this policy will be monitored and evaluated by all members of staff. Any concerns will be reported to the Headteacher immediately.
